## SUMMARY

Full-Stack Software Engineer with 5+ years of professional experience building and owning production web applications using React, TypeScript, Next.js, and Ruby on Rails. I'm motivated by building software that simplifies complex work and makes a meaningful difference for real people. I've led features from ambiguous ideas to reliable, maintainable systems serving users at scale, bringing strong debugging instincts, thoughtful collaboration, and a high standard of accountability to every system I build.

## TECHNICAL SKILLS

|                                      |                                                                                         |
|--------------------------------------|-----------------------------------------------------------------------------------------|
| <b>Core Stack:</b>                   | TypeScript, JavaScript (ES6+), React, Next.js, Ruby, Ruby on Rails, Node.js, PostgreSQL |
| <b>Languages &amp; Fundamentals:</b> | Python, SQL, HTML, CSS, SCSS, OOP                                                       |
| <b>APIs &amp; Data:</b>              | REST APIs, GraphQL, Express, ORM, RxJS, MongoDB, Sanity CMS                             |
| <b>Frontend &amp; UI:</b>            | Tailwind CSS, Redux, Bootstrap, Framer Motion, Storybook                                |
| <b>Testing &amp; Quality:</b>        | Jest, Cypress, Test Automation, TDD, SDLC                                               |
| <b>DevOps &amp; Deployment:</b>      | CI/CD, Docker, GitHub Actions, CircleCI, AWS S3, Vercel, Heroku, Linux/Unix CLI         |
| <b>AI Integration:</b>               | OpenAI API (GPT models, prompt design, structured response parsing)                     |
| <b>Tools &amp; Collaboration:</b>    | Git, GitHub, Jira, Confluence, Figma, Agile/Scrum                                       |

## PROFESSIONAL EXPERIENCE

### The Gnar Company, Inc.

Boston, MA

Software Engineer in Test

August 2021 – February 2024

- Developed and maintained a production web application using React, RxJS, and Ruby on Rails, supporting 7,300+ submissions and enabling \$3.3M+ in property tax credits across 16 states.
- Built full-stack features improving performance, reliability, and user experience under production traffic.
- Led testing and root-cause analysis of complex cross-stack production issues, acting as an escalation point during high-traffic events.
- Expanded automated test coverage and formalized test strategy, increasing release confidence and long-term system stability.
- Coordinated release validation and deployments across environments to ensure stable, reliable releases.
- Partnered cross-functionally to deliver production-ready solutions and contributed to code and architecture reviews.

## VOLUNTEER EXPERIENCE

### Metro Church

Philadelphia, PA

Software Developer

January 2023 – Present

- Built and maintained a production web platform using React, Next.js, TypeScript, GraphQL, Sanity CMS, and AWS S3, delivering dynamic content to thousands of weekly visitors.
- Designed and launched a scalable Sermons platform with robust content models, advanced filtering, and structured metadata to improve discoverability and usability.
- Re-architected CMS taxonomy and implemented automated slug generation and validation, improving URL consistency and editorial governance.
- Optimized performance and SEO through frontend and content structure enhancements, strengthening search visibility and site responsiveness.

## ADDITIONAL EXPERIENCE

### J & H Seafood

New Castle, DE

Sales Manager

January 2015 – July 2020

- Led sales strategy and operational improvements that drove ~25% average annual revenue growth, strengthening customer relationships and operational efficiency.

### U.S. Army

74D – CBRN (Chemical, Biological, Radiological and Nuclear) Specialist

July 2010 – July 2018

- Conducted risk assessments and developed mitigation strategies for CBRN threats, ensuring the safety and preparedness of military personnel through comprehensive training programs and emergency response protocols.

## EDUCATION

App Academy

New York, NY

Certificate, Full-Stack Software Development

July 2020 – October 2020

Temple University

Philadelphia, PA

B.S., Biochemistry

September 2011 – December 2015
